

5 MORSE CODE: DECIDED!
It's finally been decided. Australian amateurs will have full access to *all* HF bands with a 5wpm Morse test. But is this the end of it? Or just the start? Editor Chris checks it out.

12 BASIC ELECTRICITY
Ah, the inducement of inductance... Okay, so what *is* inductance, and what is an inductor? Better ask resident know-all inductor instructor, Ron Bertrand. Then we'll *all* know!

20 MAKE A SCANNER OR TWO-WAY ANTENNA
This report is for everybody who owns a hand-held anything! What do you do when your scanner or handie-talkie antenna carks it? You really want to pay big bucks for a new one? Why not *make* one instead! Check out this great report from Jason Reilly!

Hit that Survey TODAY!!

40 READER SURVEY
Hey, we've been threatening to do this for quite a while, and here it is. We can think of 20 good reasons to fill in the forms too! Yep, there are 20 great prizes up for grabs — plus you get the chance to help us shape your magazine up for the 21st Century. Please, take the time to tell us what *you* think!

40 INTERFERENCE FIXED!
One of the most annoying problems any radio buff can experience is local interference wiping out the bands. Tony Shields' radio was wiped out by a strong local noise. Here's how we helped him overcome the problem!

80 LAST WORD — IT'S A GUY THING
Radio is a 'guy thing'. So says John Kolm. Check this out and see if you agree!
