

Features

10 How To Cut Your Greenhouse Emissions; Pt.2

More surprises – how solar water heating can be environmentally worse than gas water heating, for example – by Peter Seligman

25 Ezitrak Vehicle Security System

The story was all about a carjacking in Nigeria, foiled by an Aussie vehicle tracking system . . . but we wanted to know more! – by Ross Tester

36 The LM4562: a new super-low-distortion opamp

This new National Semiconductor chip is used in our Class-A preamp. We discovered how difficult it was to measure its low distortion! – by Mauro Grassi

84 Review: Rigol DS5062MA Digital Storage Oscilloscope

A dual-channel 60MHz DSO and a real-time sampling rate of 1GS /s for under \$1000? It's a lot of scope – by Mauro Grassi

Projects To Build

14 20W Class-A Amplifier Module; Pt.3

This low-noise, low-distortion preamp and remote volume control module complements the Class-A design perfectly – by John Clarke & Greg Swain

42 Adaptive Turbo Timer

Any vehicle with a turbo needs the capability of letting the engine run on to cool down properly. This adaptive timer does it automatically – by John Clarke

57 Subwoofer Controller

All the features you want in a Subwoofer Controller, including low and high-pass filter, parametric equaliser, sub amp switching and more – by Jim Rowe

72 Build A 6-Digit Nixie Clock, Pt.2

We introduced it last month – now you get to build this amazing retro clock with its warm glowing Nixies and contrasting blue LEDs – by David Whitby

Special Columns

30 Circuit Notebook

• 12V or 24V Traffic Indicator • Airflow Detector using a torch bulb
• Freezer Alarm with LED temperature readout • PICAXE thermostat for a 240V heater • White LED touch light • MP3 player remote control

38 Serviceman's Log

Serviceman of the Overflow – by the TV Serviceman

90 Vintage Radio

Restoring an AWA 948C Car Radio – by Rodney Champness
