

FEATURES

- 6 A Brief Look At Liquid Crystal Displays** by *Daniel Katznelson*
How they work & why they're popular
- 32 The Oriol: Jamo's Flagship Loudspeaker System** by *Leo Simpson*
Three-way system has no expense spared
- 79 The Story Of Electrical Energy, Pt.21** by *Bryan Maher*
How electric lighting came to Sydney streets

PROJECTS TO BUILD

- 16 Build An FM Radio Receiver** by *Darren Yates*
Uses just two chips & runs off a 9V battery
- 22 Modifications To The Drill Speed Controller** by *Leo Simpson*
Amended circuit has longer gate pulses
- 24 A 2kW 24VDC To 240VAC Sinewave Inverter, Pt2** by *John Clarke*
The DC-DC converter circuitry
- 34 The M.A.L. 4.03 Microcontroller Board** by *Barry Rozema*
Uses a 68HC705C8 microcontroller
- 40 An Automatic Nicad Battery Discharger** by *Bernie Gilchrist*
Puts new "zip" into your nicad batteries
- 62 An Infrared Night Viewer** by *Branco Justic*
It lets you see in the dark
- 74 Simplifying The Interphone Telephone Exchange** by *Leo Simpson*
Simple modification eliminates up to 18 ICs

SPECIAL COLUMNS

- 44 Serviceman's Log** by *the TV Serviceman*
I did it; but it wasn't my fault
- 58 Vintage Radio** by *John Hill*
Converting a battery set to mains operation
- 66 Amateur Radio** by *Garry Cratt*
A PLL demodulator for amateur receivers
- 84 Remote Control** by *Bob Young*
A low-cost speed controller using discrete ICs
- 88 Computer Bits** by *Darren Yates*
The PHd pocket hard disc drive
