

Special Features

- 12 COVER SHOOT-OUT — ICOM vs KENWOOD vs YAESU:** Here's one story which *had* to happen. We wanted to know which radio is *best* in the expensive 'all bells and whistles' HF base segment, so we pitched the established Icom IC-751A against the Kenwood TS-850S and Yaesu FT-990. Putting rigs against each other in head-to-head combat can yield unlikely results — so did it this time? Read on to find out.
- 18 1992 AACP THEORY COURSE — PART TWO:** Paul Butler presents the second part of our all-new AACP theory course designed to help you to get that full or limited call. This month, Paul introduces the HF bands, and explains the vagaries of HF propagation.
- 21 HY-GAIN IS BACK:** It's not really *been* anywhere, it's just that these respected HF antennas have been very hard to get hold of in this country. The new local Hy-Gain distributor reckons he's going to change all that — and if first impressions are anything to go by, he may well be right! Managing Editor Len Shaw, VK3NLS boosted his signal by a few S-points to bring us his review of two exceptional HF monobanders...
- 47 PROFILE: SGC, A NEW KID ON THE OZ HF BLOCK:** So who *is* this SGC mob we've seen advertised for a few months? To find out, we asked Neil Duncan, VK3OK, to visit Seattle, USA and file a report on what makes this American communications company tick.

Cover: You wouldn't usually look in the middle of busy King Street in the heart of Melbourne to find a HF transceiver or three, but we did, and we dug up three of the nicest radios! Actually, the funniest part of it all was probably for anyone watching the editor and his embarrassed photographer turning up in the middle of a heavy roadworks session clutching piles of radios — then trying to persuade the busy road workers to actually let us half-bury the radios! "Hey! You gotta hot rydeos, eh? You wanta we bury with stime-roller, no?" Read our report for more.

Next issue out March 17. Subscriber copies posted March 12.

Regular Features

- 4—**QSP:** Thoughts from Chris Edmondson, VK3YID.
- 6—**NEWS DESK:** News and more...
