32 Water, Water Everywhere?

Earth might be a water-filled planet, but we ask whether Australia is doing enough to ensure a wet and wild future. **By Mark Yeow**

38 The Year In Science

From the possible revision of the Standard Model to the amateur space race, five trends that will define the year to come.

44 Deeper

Engineers are testing the limits of mining and pushing farther underground than ever before. How far can they go? **By Xan Rice**
