The ABC's beam into Asia

ATVI, the ABC's C-band satellite service to Asia, is now into its second year of operation. Barrie Smith looks at what's been achieved to date in his story starting on page 26.

Automatic txfrmr tester

Traditionally, transformer testing has been costly and time consuming. But UK firm Voltech has changed this dramatically, with its new microprocessor controlled and easily programmed automatic transformer testers. See our story on page 112.

On the cover

Federal Publishing's receptionist Robin Morrey kindly volunteered to model the new Koss Quiet Zone 1000 noise-cancelling headphones for us, when they arrived after Louis Challis had reviewed the ANVT originals. You'll find Louis' review starting on page 8. (Picture by Peter Beattie)
