

Go back 20 years and CB was alive, a fascinating and vital arena. Here's a nostalgic look at Australian CB in the '70s...

CRITICALLY-COUPLED ANTENNAS — PART 2

Phil Harman, VK6APH concludes his description of a short boom beam with a lot to offer...

FIRST VK REVIEW: ICOM IC-2350

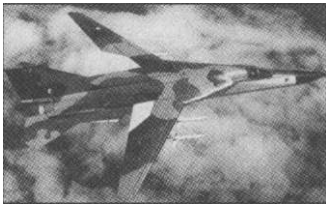

VK3CE checks out a dual-band FM mobile rig with something for *all* grades of amateur licensee...

REVIEW: THE SNIPER

Here's an Oz-made CB base antenna which *really* delivers the goods! A Ken Reynolds review...

WHAT'S THE INTERNET REALLY ABOUT?

Here's part three of our Internet primer. This month, Tom takes us surfing the WWW, and looks at email and newsgroups.

COVER STORY — MILITARY AIRCRAFT

Bob Bell, our guru of the aircraft bands, concentrates on military matters this month, with a close look at our own RAAF.

COMPETITION — WIN A UNIDEN UBC9000!

We have not one but *two* of these marvellous scanner/receivers up for grabs this month. Rush this!

PR for the great photo on the front cover

COMPETITION — WIN A SUPER ICOM IC-706!

We raved about this newcomer in its first VK review last month. Now you have the opportunity to get one for free! Better check this out *fast*...

55

POWER MICROPHONES

Ever wanted to put a signal out on all 40 channels at once? Use a power mic the wrong way and you well may. But there *is* a place for them, as Ken Reynolds reports...

58

FEEDBACK - LETTERS

Uh oh. The old Morse Code yes/no debate rears its ugly head again — but this time you'd better read the Editorial. It's time for a change...

64

DXing THE UTES

Morse Code may hardly be relevant to amateur radio any more, but it *is* a seductive mode, and tracking down the signals can be fun. Richard Jary goes in search of the most challenging utes of all — Morse signals.

82

BUYING A COMPUTER FOR THE SHACK

With all the hype which surrounds the personal computer market place, it's easy to get confused. We asked a computer industry pro to cut through all the baloney and give us some straight answers...

84

AMATEUR BAND PLANS

Are you allowed to operate on 3795kHz or not? Can you run FM on 144.2MHz? Band plans and regulations can be hard to nut out. The WIA comes to our rescue...

Don't miss our next great issue — it's out December 20!
