WINRADIO IN A BOX!

Here's a great new all-Australian receiver. The original WINRADIO is a card which slots inside your PC, but what if you have a laptop? Here's the answer. Michael Evans checked it out for you...

AN ELEVATED EARTH...

Here's a really interesting approach to providing an effective Earth counterpoise for your HF antennas. Steve Ireland, VK6VZ reports.

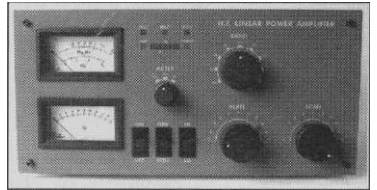

CONSTRUCTION ZONE - BUILD A SUPERHET RCVR

This month Harold Hepburn, VK3AFQ describes an innovative receiver project for you to build at home.

A REALLY GOOD READ!

REVIEW: EMTRON DX-1

A couple of months ago we checked out the all-new Emtron DX-2 linear amplifier. It's a real whopper, but the DX-1 is designed for Australian laws, and coasts along at a happy 400 watts. Neil Duncan *wants* one!

MAGELLAN BLAZER12

Here's a great new GPS receiver. It's affordable, and runs a 12-channel parallel receiver. Fast and accurate... Arthur Andrews put it to a good use...

1999 AMATEUR DXCC LIST

Here's the latest DXCC List for radio amateurs, carefully checked for us by Jim Smith, VK9NS. List it out and stick it on the shack wall!

TERLIN OUTREACH

You've seen those neat Outbacker HF antennas on cars and trucks? Okay, now imagine it's 12 feet long! Chris Edmondson checked it out...

A DECADE OF DX INTER

No! It couldn't be 10 years of CB DX reports, could it? Well, yes. Jack Haden looks back over 10 turbulent years of reporting world CB antics...

UHF CB REPEATERS

Heading for the bush? Take this handy repeater guide with you!

JUDICIOUS REX...

This month, Judicious looks back to a more *gentle* era of radio.
